

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

PYROIL BRAKE PARTS CLEANER PART NOS. BPC-20, BPC-5, BPC-54

- Removes Brake Fluid, Grease, Oil, and Brake Dust Instantly
- Flushes Oil, Dirt, and Carbon from Electric Motors
- Contains No Petroleum Solvents
- Non-Flammable and Non-Conductive
- Leaves No Residue
- Powerful Aerosol Assists Cleaning Action

Superior Cleaning Power

Brake cleaners which “evaporate instantly” or claim to be “fast drying” can leave an oily residue. Dissolved oil, brake fluid, and grease are left behind when the brake cleaner evaporates. **Pyroil Brake Parts Cleaner** controls the rate of evaporation so dissolved oil and contaminants are carried away, rather than redeposited on the brake parts.

Electric Motors

Pyroil Brake Parts Cleaner is non-flammable and non-conductive, which makes it a natural for cleaning electric motors. Brushes in a running electric motor cause sparks which could ignite a flammable cleaner, its vapors, or residue. A conductive cleaner could short an electric motor, causing a catastrophic failure. **Pyroil Brake Parts Cleaner** is neither conductive nor flammable and can be used safely on equipment while operating.

Easy To Use

For large, open areas, simply hold can upright 4-6 inches from part to be cleaned and spray. An extension tube is provided for pinpoint accuracy and for hard to reach areas.

Applications

Pyroil Brake Parts Cleaner may be used on brake parts, pads, linings, drums, rotors, calipers, springs, backing plates, etc. It is an all-round degreaser and may be used on clutch discs and pressure plates, electric motors, switches, and contacts.

Technical Data:

Specific Gravity	1.61-1.63
Propellant	CO ₂
Flash Point	Will not flash
Appearance	Clear Liquid

This information only applies to products manufactured in the following location(s): USA, Canada.
