

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

PYROIL ENGINE DEGREASER PART NO. EDG-20

- A Blend of Powerful Solvents, Cleaners, and Emulsifiers
- Quickly Penetrates Grease, Oil, Dirt, and Grime
- All-Purpose Degreaser
- Safe To Use On Concrete Driveways
- Cleans Engines, Lawn Mowers, and Engine Parts
- Removes Oil and Grease From Painted Concrete

Oil and grease seem to always find their way to the outside of engines. Dust and dirt stick to the oily surface and absorb even more oil. If this process is allowed to continue, a thick grimy coating forms. **Pyroil Engine Degreaser** contains powerful solvents and cleaners to quickly penetrate grease, oil, dirt, and grime. Detergents then help water wash away the emulsified oil and dirt. Unlike foamy engine degreasers that hold the cleaners away from the surface to be cleaned by air bubbles, **Pyroil Engine Degreaser** wets the surface, concentrating all its cleaning power right on the engine. **Pyroil Engine Degreaser** contains no chlorinated solvents and is even safe to use on painted concrete or painted concrete blocks.

Easy to Use:

Scrape off heavy buildup of grease and grime. For best results, engine should be warm (NOT HOT). If engine is cold, start and let idle until warm. If engine is at full operating temperature (HOT), let it cool for thirty minutes. Cover distributor and carburetor with plastic. Spray **Pyroil Engine Degreaser** directly onto the surface to be cleaned. Allow to penetrate grease, oil, or grime and then hose off with water.

Technical Data:

Appearance	Clear, Amber Liquid
Flash Point, °F	120 Minimum
Propellant	CO ₂
Specific Gravity	0.81

This information only applies to products manufactured in the following location(s): USA, Canada.
