

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

PYROIL SUPER CONCENTRATED FUEL INJECTOR CLEANER

- **Cleans Injectors Plus Intake Valves**
- **Maintains New Car Performance**
- **Safe for Catalytic Converters and Oxygen Sensors**
- **Restores Power and Performance**
- **Contains No Alcohol**

Cleans Entire Fuel Induction System

Fuel induction systems include carburetors or fuel injectors, intake ports, and intake valves. Deposits in any of these areas can impair fuel economy and driveability. Intake system deposits result when gasoline hydrocarbons and certain additives form on the surface of fuel injectors, intake manifold runners, intake ports, and intake valves. Researchers have documented that particular types of engine oil chemistries can also contribute to the formation of intake system deposits. The most common symptoms associated with fuel injector deposits are stalling, hesitation, and stumbling. Intake port and intake valve deposits can cause poor cold start, stumbling, and decreased warm engine performance. **Pyroil Super Concentrated Fuel Injector Cleaner** removes not only fuel injector deposits, but also deposits from intake manifold runners, intake ports, and intake valves as you drive. In most cases, driveability and power are restored in just one tankful of treated gasoline.

Easy To Use

To ensure proper mixing, add one bottle of **Pyroil Super Concentrated Fuel Injector Cleaner** to the fuel tank before filling with gasoline.
