

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

PYROIL POWER STEERING FLUID SEALER & CONDITIONER

- Provides Smooth, Quiet Steering
- Helps Stop Leaks
- Prevents Seepage
- Keeps Seals and "O" Rings Soft and Pliable

Need

Rubber seals and "O" rings contain plasticizers which make seals soft and pliable. However, over time, hot oil removes the plasticizers, causing seals and "O" rings to shrink, harden, and become brittle, which can cause power steering fluid to seep and leak from the power steering system.

Function

Pyroil Power Steering Fluid Sealer & Conditioner is a combination of specially formulated lubricants and additives designed to prevent leakage and eliminate squealing under severe conditions. It revitalizes seals and "O" rings by returning them to their original size. Unlike some seal swellers, **Pyroil Power Steering Fluid Sealer & Conditioner** does not make seals weak and spongy by continuing to swell seals beyond their original size.

Recommended Use

Just add to automobile's power steering fluid reservoir to help stop leaks or seepage. Do not overfill. Recommended for year-round use in GM, Ford, and Chrysler vehicles. **NOT RECOMMENDED FOR USE IN HONDAS.**

Technical Data

Appearance	Clear, Brown Liquid
Flash Point, COC	340°F minimum
Viscosity @ 100°C	7 - 8 cSt
