

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

Valvoline Water Remover

- **Removes Water from Fuel Systems**
- **Stops Gas Line Freeze**
- **Safe for Fuel Injectors**
- **Use Year-Round**
- **Safe for Oxygen Sensors and Catalytic Convertors**

Water in Fuel Means Trouble

Water is almost always present in fuel, either as results of contamination or condensation. Ice during cold weather and rust during any weather mean trouble. **Valvoline Water Remover** inhibits both ice and rust while removing water from the fuel system.. Rust, like ice, can stop fuel flow by clogging filters and critical passages in the fuel system. Most importantly, the presence of rust means some component of the fuel system is deteriorating. Unlike ice, rust occurs year-round, which means fuel systems need year-round protection. **Valvoline Water Remover** is formulated with a proven rust inhibitor.

Oxygen Sensors - Catalytic Converters - Fuel Injectors

Valvoline Water Remover will not harm oxygen sensors or catalytic converters.

Technical Data:

Specific Gravity	0.79 at 60°F
Appearance	Clear, Colorless Liquid

Effective Date:
3/1/11

Expiration Date:

Replaces:

Author's Initials:
RJB

Code
