

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

VALVOLINE PROFESSIONAL SERIES AUTOMATIC TRANSMISSION SERVICE KIT

- A 2-step professional service
 - Designed for use with an automatic transmission fluid exchange machine
 - Cleans & Conditions the entire automatic transmission system
 - Valvoline professional series automatic transmission flush safely removes deposits
- Valvoline professional series transmission protector, conditioner & sealer helps maintain shifting performance

Valvoline Professional Series Automatic Transmission Service Kit is designed to clean the entire automatic transmission when used with an automatic transmission exchange machine. A conventional transmission service only removes a small portion of the contaminated fluid. Only the fluid in the pan gets replaced, leaving contaminated fluid in the rest of the automatic transmission system. A conventional transmission service does not include a flush which can leave contaminants on the valve body and transmission cooler.

Valvoline Professional Series Automatic Transmission Service Kit is a two step, professional process to provide the best cleaning and protection available. Valvoline professional series automatic transmission flush contains cleaners designed to remove deposits from the transmission system; which if left in place, could cause sluggish shifting and reduced heat transfer. Valvoline professional series automatic transmission flush safely removes deposits when used as directed. Valvoline professional series transmission protector, conditioner & sealer helps maintain shifting characteristics and protection from wear. It conditions seals to help prevent leaks and helps protect transmission fluid from high temperature breakdown. Valvoline professional series transmission protector, conditioner & sealer is compatible with all types of transmission fluid.

Technical Data

Automatic Transmission Flush

Appearance	Clear brown liquid
Specific gravity @ 60 F	0.8190
Flash point, TCC, F	156

Transmission Protector, Conditioner & Sealer

Appearance	Clear red liquid
Specific gravity @ 60 F	0.8755
Flash point, COC, F, min.	350
