

Product Information

A PRODUCT OF THE VALVOLINE COMPANY A DIVISION OF ASHLAND INC.

VALVOLINE PROFESSIONAL SERIES POWER STEERING SERVICE KIT

- A 2-step professional service
 - Designed for use with power steering flush equipment
 - Removes old contaminated fluid from the power steering system
- Valvoline professional series power steering flush helps lift and remove contaminants
- Valvoline professional series power steering fluid is a synthetic blend to help ensure maximum performance

Valvoline Professional Series Power Steering Service Kit has been designed for use with power steering service equipment to clean the entire power steering system. During everyday driving, power steering fluid is subjected to high shear and heat that can change the properties of the fluid itself. Contaminants from wear debris and oxidation can increase wear and reduce the efficiency of the power steering system. Since the power steering system is a hydraulic system, it needs to be as clean and free from contaminants as possible.

Each part of **Valvoline Professional Series Power Steering Service Kit** is formulated to provide the best cleaning and protection available. Valvoline professional series power steering flush will safely lift and remove contaminants when used as directed. It is formulated with the correct viscosity and additives to clean the power steering system without harming seals or any other components of the power steering system. Valvoline professional series power steering fluid is a synthetic blend that will maximize performance over a wide temperature range. Its naturally high viscosity index helps maintain the correct viscosity even with high shear conditions. Valvoline professional series power steering fluid helps prevent squeals and leaks, helps prevent corrosion and will not clog or foam. Meets Ford, GM and Chrysler specifications.

Technical Data

Power Steering Flush

Appearance	Clear yellow liquid
Specific gravity @ 60 F	0.8594
Flash point, COC, F, min.	350

Power Steering Fluid

Appearance	Clear yellow liquid
Specific gravity @ 60 F	0.8493
Flash point, COC, F, min.	350
